CANADIAN FERTILIZER QUALITY ASSURANCE PROGRAM

The Canadian Fertilizer Quality Assurance Program (CFQAP) is a national quality control program that has been designed by Agriculture Canada. Each fertilizer manufacturer/blender rated in this publication has implemented this voluntary program in their own plant. Agriculture Canada recognizes the efforts and commitment of these companies to manufacturing high quality fertilizers.

1991 is the second year in which manufacturers/blenders have been rated in the Canadian Fertilizer Quality Assurance Report. The plant ratings* reported here are based on the samples taken under this program. In addition to the samples taken by the companies (948 companies submitted 5940 sample results), Agriculture Canada inspectors took samples (745 samples from 477 companies) from many of these companies. These sample results have been combined with the company sample results to give the plant rating. As with any new program, it would be prudent not to judge individual performance on only one year's results. On an industry wide basis it compares favorably with past performances.

This report is divided into 2 main sections. These are:

1) Ratings for materials (basic ingredients used to manufacture blends).

2) Ratings for blends.

*(See Page iii for a description of the Rating System.)

If you have any questions or comments regarding this report please contact John Ramsay at:

Programme canadien de vérification de la qualité des engrais

Le Programme canadien de vérification de la qualité des engrais (PCVQE) est un programme national mis sur pied par Agriculture Canada. Chaque fabricant dont la qualité des engrais est évaluée dans la présente publication a déjà établi ses critères dans son propre établissement. Agriculture Canada reconnaît les efforts que déploient ces compagnies pour produire des engrais de qualité supérieure.

C'est-la deuxième année en 1991 que les fabricants se voient attribuer une notation dans le Rapport canadien de vérification de la qualité des engrais. Les notations * obtenues par les différentes compagnies sont basées sur les échantillons prélevés dans le cadre de ce programme. En plus des échantillons prélevés par les compagnies (948 compagnies soumettant 5940 échantillons) les inspecteurs d'Agriculture Canada ont prélevés des échantillons (745 échantillons de 477 compagnies) d'un bon nombre de ces compagnies. Les résultats obtenus par les deux groupes (compagnies et Agriculture Canada) ont été regroupés pour donner une notation globale de l'établissement. Comme pour tout nouveau programme, il serait prudent de ne pas juger les performances individuelles d'après les résultats d'une seule année. Basé sur l'ensemble de l'industrie, ils se comparent favorablement aux performances antérieures.

Ce rapport est divisé en 2 sections :

1) Notation pour les engrais de base (ingrédients de base utilisés dans la production des mélanges).
2) Notation pour les mélanges.

* (Voir page iv pour une description du système de notation.)

RATING SYSTEM

The results for each location which has sample results are summarized according to a plant rating system consisting of the following categories: AAA, AA, A, B, C and F.

Blended Fertilizers

Individual plant ratings of blended material are based on the commercial value (measured by the Combined Nutrient Level (CNL)) and the accuracy of the ratio of plant nutrients (measured by the Ratio Compliance Index (RCI)). The product of these two factors is known as the Quality Control Index (QCI) and the average is used to determine the plant's standing.

Plant Rating Intervals

The Plant Rating Intervals for the QCI are as follows:

Ratings	QCI Range
AAA	100.0 - 99.51
AA	99.5 - 98.51
A	98.5 - 96.51
B	96.5 - 92.51
C	92.5 - 84.51
F	<84.50

Significance of the Letter Ratings

The letter ratings **A - AAA** indicates that the blender is providing good commercial value (i.e. ingredients) and a well blended product. The higher the letter rating the more consistent the blender is in providing a good quality fertilizer.

RATING SYSTEM

Fertilizer Materials

Fertilizer materials are assessed according to current analytical tolerances. Individual samples are designated as being in compliance if the results of analysis do not exceed the tolerances which accommodate unavoidable variation associated with sampling and analysis.

Plant Rating:

AAA	95.1% or more of samples in compliance
AA	85.1-95% of samples in compliance
A	75.1-85% of samples in compliance
B	65.1-75% of samples in compliance
C	50.1-65% of samples in compliance
F	less than 50% of samples in compliance

SYSTÈME DE NOTATION

Les résultats pour chaque établissement sont publiés selon un système de notation utilisant les catégories suivantes : AAA, AA, A, B, C, et F.

Engrais mélangés

Le système de notation pour chaque établissement manipulant des engrais mélangés est basé sur la valeur commerciale de l'engrais (mesurée par le principe nutritif combiné (CNL) et l'exactitude du rapport entre les éléments nutritifs (mesuré par l'indice de conformité au rapport nutritif (RCI)). Le produit de ces deux facteurs est connu comme l'indice de contrôle de la qualité (QCI) et la moyenne des résultats obtenus sert à déterminer la note de l'établissement.

Intervalles du système de notation :

Les intervalles du système de notation pour le QCI sont :

Notation	Intervalles
AAA	100,0 - 99,51
AA	99,5 - 98,51
A	98,5 - 96,51
B	96,5 - 92,51
C	92,5 - 84,51
F	<84,50

Signification du système de notation

La catégorie alphabétique **A-AAA** indique que l'établissement manipulant des engrais mélangés fabrique un produit de haute valeur commerciale (c.-à-d. ingrédients) et un produit qui est bien mélangé. Plus la notation est élevée, meilleur est l'engrais fabriqué par l'établissement.

SYSTÈME DE NOTATION

Engrais de base

Les résultats d'analyse pour les ingrédient simples sont évalués selon les tolérances analytiques. Les échantillons seront conformes si les résultats (en tenant compte des variations inévitables associées à l'échantillonnage et à l'analyse) ne dépassent pas les tolérances permises.

Système d'évaluation :

AAA	Conformité de 95,1 % et plus des échantillons
AA	Conformité de 85,1 à 95 % des échantillons
A	Conformité de 75,1 à 85 % des échantillons
B	Conformité de 65,1 à 75 % des échantilons
C	Conformité de 50,1 à 65 % des échantillons
F	Conformité de 50,1 % et moins des échantillons
